_Hello Bee Keepers of Volusia Co.

I’m sitting here at the Southern District Physical Education convention in Orlando, wondering why I’m not working on my hardware and visiting my girls. That’s right I’m here and would rather bee with my bees. The list of things I should be doing is long and daunting. My girls have already suffered from my busy schedule and lack of attention, I have lost 7 full hives this winter. The most probable culprit is varoa mites or the viruses they carry. The chores I should have already completed are repairing/ painting old hardware, building new hardware and frames, put out swarm traps and check for early spring build up to head off the early swarming. It may be time to add space or supers and the list goes on.

As I look forward to the meeting on Feb. 22, I would like to take this opportunity to thank Tom and Rita Bartlett for stepping up and organizing this club and taking such a big leadership role in it. I only hope Mike and I can do the job justice. Lastly if you can join us at the UF Bee College on March 9&10 at the old Marine Land Park, I’ll be volunteering because I’m not testing this year, Tom is presenting and several others including Mike Hayes are testing on the 8th of March.

See you in the Bee yard

Marlin Athearn—President Beekeepers of Volusia County

UF Master Beekeeper Program
Events of Interest to Beekeepers

February 22, 2012 … Beekeepers of Volusia County Meeting

University of Florida - Bee College - March 9th and 10th, 2012

University of Florida Master Beekeeping Exams Thursday, March 09, 2012

March 28, 2012 — Beekeepers of Volusia County Meeting

Annual Tupelo Honey Festival in Wewahitchka, Florida, May 19, 2012

Honey Bee Facts & Trivia

How fast can a bee fly?  
Answer — 15 miles per hour

How long does a honey bee live? 
Answer—4 weeks

How far does a bee fly to make 1 lb of honey?  
Answer— 55,000 miles

How fast does a honey bee’s wings go? 
Answer—200 times per second

How much honey does a bee make in a lifetime? Answer—1/10th of a teaspoon

How many worker bees does it take to make a pound of honey? Answer—10,000 and it takes 25,000 trips to flowers to collect pollen & nectar

A pound of honey is the essence of how many flowers? Answer— 2 million

Honey bees can see all human colors and ultraviolet except for what color—Answer—Red

How much honey does a bee eat to make one pound of wax? - Answer—6 to 8 pounds

<th>Month</th>
<th>Management Calendar</th>
<th>Blooming Plants</th>
</tr>
</thead>
</table>
| **January** | 1- Feed colonies if light (colonies can starve!)  
2- Nosema can be a significant colony problem this time of year. You can treat colonies for Nosema disease using Fumigillin. Colonies may need as much as 4 gallons of medicated syrup to control *Nosema ceranae*.  
3- Repair/paint old equipment | Sand Pine\(^F\), Maple\(^F\), Willow\(^FM\) \(F\) continues to bloom in February \(FM\) continues to bloom in February and March |
| **February** | 1- Feed colonies if light (colonies can starve!)  
2- Can treat colonies for Nosema disease using Fumigillin.  
3- Can treat with Terramycin or Tylan for AFB. | Plum\(^M\), Cherry\(^M\), Oak\(^M\), Walther Viburnum\(^M\), Sweet Clover\(^M\), Blueberry\(^M\), Haw\(^M\), Fetterbush\(^M\) \(^M\) continues to bloom in March |
| **March** | Note: Citrus blooms in March. Make sure your colonies are ready. Talk with your growers about their pesticide habits.  
1- Attend UF Bee College in Marineland!!!  
2- Colony Populations begin to grow! Add supers and/or control swarming as necessary.  
3- Can treat with Terramycin or Tylan *dust* for AFB/EFB.  
4- Make nucs/splits. | Orange, Spanish Needle |
| **April** | 1- Disease and queen problems should be remedied.  
2- Make splits/nucs – new queens available  
3- Control swarming  
4- Add supers, the nectar flow began in late March | Orange, Sweet clover, Wild Blueberry, Haw, Fetterbush\(^M\), Spanish Needle\(^MJ\), Galberry\(^M\), Dog Hobble\(^MJ\), Palmetto\(^MJ\), Mexican Clover\(^MJ\), Butter Mint\(^MJ\) \(^M\) continues to bloom in May \(^J\) continues to bloom in June \(^MJ\) continues to bloom in May and June |
| **May** | 1- Continue to inspect for colony maladies but don't treat for diseases while producing honey  
2- Continue swarm control  
3- Super as necessary | Palm\(^J\), Gopher Apple\(^J\), Joint Weed\(^J\), Sandhill Prairie Clover\(^J\), Spiderwort/Dayflower\(^J\) \(^J\) continues to bloom in June |
<table>
<thead>
<tr>
<th>Month</th>
<th>Management Calendar</th>
<th>Blooming Plants</th>
</tr>
</thead>
</table>
| June    | 1- Super as necessary for late flowers  
2- Varroa populations begin to grow – monitor colonies closely. The economic threshold is 60+ mites/day on a sticky screen or 17+ mites in an ether roll. Treat if you exceed these numbers. | Mangrove, Red Bay, Cabbage Palm                                                  |
| July    | 1- Remove and process honey – main flow stops  
2- Varroa populations begin to grow – monitor colonies closely. The economic threshold is 60+ mite/day on a sticky screen or 17+ mites in an ether roll for a colony of average strength. Treat if you exceed these numbers. Options include: Apiguard, ApilifeVAR, Mite Away II. | Spanish Needle<sup>AS</sup>, Palmetto, Mexican Clover<sup>AS</sup>, Buttermint, Palm, Gopher Apple, Joint Weed<sup>A</sup>, Redbay<sup>AS</sup>, Sandhill Prairie Clover<sup>A</sup>, Partridge Pea<sup>A</sup>, Mangrove<sup>A</sup>, Primrose Willow<sup>AS</sup>, Spiderwort/Dayflower<sup>AS</sup>  
<sup>A</sup>continues to bloom in August  
<sup>AS</sup>continues to bloom in September |
| August  | 1- Monitor colonies for varroa (see July)!  
2- Treat with Terramycin <sup>dust</sup> for AFB/EFB  
3- Feed colonies if light  
4- Monitor for and control small hive beetles  
5- It's hot! Ensure adequate colony ventilation | Spotted Mint<sup>S</sup>, Goldenrod<sup>S</sup>, Vine Aster<sup>S</sup>, Sumac<sup>S</sup>  
<sup>S</sup>continues to bloom in September |
| September | 1- Monitor colonies for varroa (see July)!  
2- Super colonies if strong B. Pepper flow  
3- Consider treating colonies for Nosema disease using Fumidil-B. Colonies may need as much as 4 gallons of medicated syrup to control <i>Nosema cerana</i>.  
5- If no nectar flow, feed colonies if light | Smart Weed, Brazilian Pepper, Bush Aster  
Note: Brazilian Pepper blooms from September through October and is a significant fall source of nectar for bees. |
| October – December | 1- Varroa populations peaked in Aug/Sept. The economic threshold is 60+ mites/day on a sticky board or 17+ mites in an ether roll for a <b>colony of average strength</b>. Treat if you exceed these numbers. Options include: Apiguard, ApilifeVAR, Mite Away II  
2- Can treat colonies for Nosema disease using Fumigillin. Colonies may need as much as 4 gallons of medicated syrup to control <i>Nosema cerana</i>.  
3- Monitor for and control small hive beetles (options include Checkmite+, GuardStar, Hood traps and West Beetle traps)  
4- Feed colonies if light (colonies can starve!)  
5- Can treat for tracheal mites (mix vegetable oil and powdered sugar until doughy (not sticky to touch); place a pancake-sized patty on top bars of brood chamber. | Oct: Spanish Needle, Mexican Clover<sup>N</sup>, Primrose Willow<sup>N</sup>, Spotted Mint<sup>N</sup>, Goldenrod<sup>M</sup>, Vine Aster<sup>N</sup>, Smart Weed<sup>N</sup>, Bush Aster<sup>ND</sup>  
<sup>N</sup>continues to bloom in November  
<sup>D</sup>continues to bloom in December  
Nov: Nothing new blooms  
Dec: Nothing new blooms |
Call to order and welcome:

Business:

- 2012 Membership Drive / Registrations / $15.00 Renewals
- Treasurer’s Report
- Receipt of the January 2012 Minutes is Pending

Presentations Discussions:

- Introduction and opening remarks by Marlin Athearn—President
- Discussion / Presentation by Mike Hayes—Vice President
- Discussion / Presentation by Tom Bartlett—Master Beekeeper
  1. Swarm management techniques—
     Checker boarding
     Swarm traps
  2. Hive Branding Irons
  3. Smoker Fuel—Pine needle bundles
  4. Pollen Party-on Can—Pollen substitute feeder
  5,
- Questions and open discussion

Adjournment
Next Meeting

Wednesday
February 22, 2012
6:30 PM

Volusia County Agricultural Center Auditorium,
3100 E. New York Ave., Deland

BEEKEEPERS OF VOLUSIA COUNTY, FLORIDA
Minutes (not yet accepted)

Bee Meeting 01/25/12

called to order by Tom Bartlett, president @ 6:30pm—45 people in attendance

Video shown "City of Bees Tales from the Hive"

Discussion of time to elect new officers.
Tom Bartlett offered to continue to write the newsletter, requested others to volunteer
Tim Schoch maintains the website

Marlin Athearn nominated & elected president
Mike Hays nominated & elected vice-president
Ron Kull nominated & reelected treasurer
Donna Balo nominated & reelected secretary

Treasurers Report: $1722.93
Halifax garden club donated $100 Expenses: $4.95 office supplies $204 subscription

Discussion to increase the volume level of the projector
Discussion for the club to purchase an extractor for club use
Discussion of club hives that were donated 2y ago.
Discussion of lifetime membership and honorary membership
Discussion of an annual bee picnic
Discussion of having a day bee-assembly classes
Discussion of beginning bee keeping classes
Discussion of options to give help & assistance for new beekeepers. Tom Bartlett, Marlin Athearn, Mike Hays are in the Master BeeKeeper program & offered to help & assist.
Discussion of storing of equipment not in use

Upcoming events include
University of Florida Bee College is March 9 & 10 at Marineland
Nursery Peerless in DeLand, organic nursery looking for beekeeper
Pine Ridge HS. 15y anniversary of agriculture have always had beekeepers attend their annual agricultural fair

Upcoming beginner beekeeper classes by Mike Hays participating:
01/28/12 10am Flagler County - 02/11/12 Museum of Arts & Sciences in Daytona Beach 1pm
Meeting ended at 8:25 pm

Submitted by Donna Balo—Club Secretary

A farmer was on his way home when his truck ran out of gas on a county road, he got out of his truck to start walking when a honey bee landed on his shoulder, need some help the honey bee asked? The farmer replied I have run out of gas, the honey bee replied, my friends and I can help. Soon after a swarm of bees came out of the woods and flew into his gas tank, after a few minutes they flew out and returned to the woods, the honey bee remarked try to start the truck now. The farmer got in the truck and found his gas tank was full of gas again, the farmer called out thanks, by the way what kind of gas is this? The honey bee replied—BP
